Project Name	Customer Persona Generator - AI Powered Marketing Persona Application
Maximum Marks	3 Marks

AI Prompt Logs

SKILL WALLET | A SmartBridge Product

Maintaining a structured record of your interactions with Large Language Models ensures reproducibility and tracks your prompt engineering iterations.

S.No	Task/Intent	System Prompt & Context	Exact User Prompt	AI Output Summary	Refinements/ Iterations
1	Define Persona Schema	Act as a Senior Data Architect. Define a comprehensive JSON schema for a Customer Persona application.	Create a JSON schema for a target audience persona including fields for: Name, Age, Industry, Pain Points, Buying Behavior, and Preferred Channels.	Generated a well-structured JSON template with defined data types.	Added "Tech Proficiency" and "Budget Range" fields for better granularity.
2	Develop Logic	Act as a Senior Python Developer. Create logic to generate persona summaries based on input parameters.	Write a Python function that takes 'Industry' and 'Age Group' as inputs and returns a detailed descriptive paragraph of the customer's typical daily routine.	Provided a functional Python script using f-strings for dynamic generation.	Added error handling to manage empty or invalid input combinations.
3	Frontend Styling	Act as a Frontend UI/UX Expert. Create a responsive card component.	Write HTML and Tailwind CSS code for a 'Persona Card' to display the generated data cleanly.	Generated a modern, clean UI component with hover effects.	Adjusted card width and font sizes for mobile responsiveness.
4	API Documentation	Act as a Backend API Specialist.	Create documentation for a POST endpoint /	Provided a clear Swagger/OpenAPI	Added specific authentication

S.No	Task/Intent	System Prompt & Context	Exact User Prompt	AI Output Summary	Refinements/ Iterations
		Document the endpoint structure.	generate-persona, including request body and sample response.	style documentation block.	headers and status code descriptions.
5	Validation Testing	Act as a QA Engineer. Create a list of edge cases for the generator.	List 5 potential edge cases for the Customer Persona Generator, such as empty inputs or nonsensical demographics.	Provided a list of test scenarios including input sanitization and boundary testing.	Added recommendations for client-side validation logic.
